Library

Library List No. 29 Washington 25, D. C., October 1946

THE MANGO

A List of References

Compiled by Helen V. Barnes

LIBRARY
CURRENT SERIAL RECORD
☆ JAN 3 1947 ☆
U. S. DEPARTMENT OF AGRICULTURE

This bibliography includes references on all aspects of the mango - botany, culture, diseases and pests, varieties, composition, nutritive value, cookery, toxic effects, uses, economics, etc. The arrangement is alphabetical by author. The index, in addition to an analysis of the specific subjects included, lists joint authors and issuing agencies.

Items marked with an asterisk (*) have not been examined. Call numbers following the citations are those of the United States Department of Agriculture Library unless otherwise noted.

17. ARNOLD, H. L., JR. Kahili flower (Grevillea banksii) dermatitis: a preliminary report. Hawaii Med. Jour. 1: 15-18. Sept. 1941. U. S. Army Med. Libr.
Dermatitis venenata is more frequently due to contact with kahili flower, than to contact with mango (Mangifera indica) which for many years has been considered the foremost cause of plant dermatitis in Hawaii. Mango dermatitis is a common diagnosis as "both the leaves and the skin of the fruit and probably the sap as well, are capable of producing dermatitis."
